SUMMARY

Motivated and creative BCA 1st year student at MJRP College with a strong interest in front-end development, web design, and UI/UX. Skilled in HTML, CSS, and basic JavaScript, with hands-on experience building responsive and user-friendly websites. Recently developed a background remover web app using JavaScript, demonstrating practical problem-solving and front-end skills. Also experienced in designing logos and digital posts for startups and clients, along with creating a UI/UX system for a factory process. Eager to gain real-world internship experience to further enhance my front-end skills and contribute to a forward-thinking tech team.

PROJECTS

Background Removerbackground

While learning JavaScript, I built a working background remover website using the remove.bg API. I am currently working on improving its design and functionality to make it more user-friendly and efficient.
